 - RUSROVER
- General Mining Equipment Repairs
- Field Service/Training
- Scheduled Equipment Servicing
- Trades Personnel

MINING OPERATIONS

- Secondary Support
- Production
- Development
- Longwall Moves
- Belt Installation and Moves
- Statutory Personnel
- Trades Personnel
- Labor Hire

A LITTLE ABOUT RUS MINING & OUR PARENT COMPANY.

RUS Mining Australia's parent company is Jikai Equipment Manufacturing Co., Ltd, in the city of Shijiazhuang, Hebei Province China.

Jikai is an industry leader in the development, manufacture, distribution and service of underground mining machinery.

Jikai provides specialized solutions in the underground mining industry for tunneling, tunnel support, longwall systems, road headers, and diesel equipment and transportation vehicles.

The main products consist of tunnel and mine support equipment, tools, safety equipment and accessories.

In Australia the current market focus for the workshop is Secondary Support equipment and consumable, and we are continually expanding our range to suit our customer needs at a more competitive rate than our competitors. We pride ourselves on our flexibility to find solutions for our customers at a competitive price without compromising the quality of products.

Other projects being developed specifically for the Australian market at the current time is a man transporter, designed to endure the harsh Australian mining conditions at a level of quality and reliability that is expected within the industry.

More details of this product will be released over the next 12 months as the project progress through various stages of the project and “mile stones” are met.

RUS MINING MINTO WORKSHOP

Capabilities
